Like the OWT Post base, the OWT Lite is beautifully designed and features some of the same patented features as the Original. It also features a 1 inch offset to meet international residential building code for installation using non-rotresistant lumber. OWT-Lite products are simplified versions original OWT products designed to meet minimum load requirements, and offered at a lower price point.

Laredo Sunset - 6 - 8" Joist Hangers Just what I needed!

I'm so happy I found these fasteners for our pergola. I was searching online for something with a little more panache than galvanized hangers and fasteners and I found these. They're heavy duty, easy to assemble and they increase the value and look of our pergola. I couldn't be happier to have these attached to our house

Great Truss System

CALLS - CALLS

I used the Truss Fan Base with Ironwood Truss Accents and 1/2" Timber Bolts to make trusses for a care port. These product made this project so much easier and look great. The fan base is both strong and good looking. The accent pieces give the trusses a finished look. The powder coat finish on all the parts should look good for a long time. Doug A ~ Verified Buyer

Alternative To Cementing Posts

As an alternative to cementing posts into the ground, I would highly recommend these anchors. Once in the ground and the posts are screwed in from all four sides, they are stable and solid. Another advantage is that the bottom of the post does not contact the ground so there is virtually no chance of rot. I installed mine after several days of rain and they were easy to drive into the ground. I used the same type of installation on a small fence 12 years ago and the posts are still straight and unmovable.

GREATERTOOLS for Success

The **NEW OZCO Project Explorer** app lets you explore projects for building a variety of pergolas, pavilions, and backyard projects. The app features over 25 do-it-yourself projects with materials, cut lists, and part lists included. Compatible with iPhone, iPad, and iPod touch.

OZCObp.com has been fully renovated and the already vast libraries of Inspiration. Bill of Materials to full Project Plans, thousands of Photos, Videos, Specs and Guides have been updated as well!

Social Media, unmatched presence across multiple platforms!

10 REASONS OZCO is the GREATER Choice In Building Materials

PATENTS

OZCO has been granted 10 US patents on its products with more pending.
 OZCO invests in protecting it's intellectual property.

?

SOCIAL PROOF \Rightarrow \Rightarrow \Rightarrow \Rightarrow

Check out our 100's of product reviews, across industry leading sources print & digital.
 Thousands of DIY and Pro submitted project pictures, posts and engagement.
 Featured on several popular HGTV & DIY home improvement shows.

COST SAVING

Custom cut steel is expensive in part to the time consuming manufacturing process and simply doesn't last as long.
 What is the cost per pound? Take the cost/weight and you will quickly see that OWT hardware has the lowest cost per pound.
 Don't pay more for less — With OZCO products that is never the case.

ADJUSTABLE

- Lumber dimensions vary tremendously from rough cut, smooth, reclaimed and so on, combined with the many types of species utilized with OWT connectors.
- Other connectors on the market require bending of the brackets or the size of material to be known before placing orders. Neither option is ideal OWT connectors are the answer offering truly adjustable on-site installation with ease.
- A complete and tight connection produces the highest level of strength and performance in any installation.

ATIONS & CONDITIONS OF USE: This product dual lise in obtain associations with the Postatal Evaluation serviced breach of the service of the design of the Postatal Evaluation papering breach shoutherm, shall lise dring panel in result all superingement and an annual set of the service of the service and the substitution are not associated fair in this product 's respective another substitution is designed for our a site spreadule factor is part substitution and the substitution of the service of the serv

All sole plates are required to be installed with full regarders base to obtain full load openity. OPTICALE For specific scenarios sortial OZCO for sociario

Not all galvanized is created equal, pre-galvanized steel does not perform as well as HDG.

- Galvanizing after production ensures all areas of the steel is uniformly coated with zinc.
- Same process used for national highway guardrails, an area subjected to some of the harshest environmental conditions.

POWDER COATED

- OWT hardware features high grade exterior power coating.
- PC performs better than liquid paint typically used by steel fabricators.
- All of the OZCO black powder coated hardware is truly uniform providing consistency & performance for the entire project.

THICKER STEEL

G-PC

mm

⇔lbs kg The thicker the steel is the stronger the connection will be.

OWT steel thickness is scaled to be more pleasing to the eye.
 Pays homage to the history of this type of timber construction.

TESTING / REPORTS

OWT hardware is not only attractive but it is also structural.

We could manufacture our products for a lower cost but our goal is to make our products perform above industries standards.

Drawings and load data listed on ARCAT for easy access.

KITS & PACKAGING

At OZCO we are builders too, so whenever possible we include the necessary hardware to keep your list short, save time & money.

3mm

Well packaged to remain in excellent condition from the store to the job-site.

Packaged in job sized quantities for DIY and Pro.

TIMBER BOLTS & SCREWS

OWT Timber Screws feature performance with strength that is second to none — in a wide range of lengths for all types of projects.
 Screws can be used successfully when the force is predominantly shear load.

Don't forget to use our Heavy Duty Washer on wood to wood connections for added strength and style.

Provider of high quality building & design content for AEC professionals throughout North America.
